

Upcoming Bozeman Open House
Thursday, March 30th
2:00 PM to 6:00 PM
822 Stoneridge Dr. Suite A-2
Bozeman, MT

About Us:

Over the past decade, we have helped patients in our Billings location find relief from common mental health disorders symptoms with IV Ketamine, Spravato®, and other advanced therapies. We have now expanded our services with the opening of our Bozeman office. Our primary focus will be to help patients who have not benefited from traditional psychiatric approaches find renewed hope and wellness.

Here are additional details about Montana Psychiatry & Brain Health Center:

- We are a physician-led practice.
 - Physician direction and supervision ensures patients receive safe, efficient, and cost-effective care.
- Currently, our Bozeman practice offers IV Ketamine and Spravato and general psychiatric services.
- Clinicians in Bozeman have immediate openings and can accept new patients.
- Our practice accepts most insurances, including Medicare and Medicaid, for all services we provide, including IV Ketamine and Spravato.

We take a collaborative approach to referred patient care. I would welcome a call from an individual looking for treatment or from a colleague to discuss any questions about services, patient care, for our brochures, or for the opportunity to introduce ourselves.

Our Bozeman direct number for patient consultation is 406-551-8001.

Sincerely,

Erin Amato, MD
Medical Director
